## Contextual Safeguarding Discussion

### Questions to Discuss (small groups 15 mins)

What activity have our traditional safeguarding partners done to make these locations safer? What else could they do?

Who else is in, or has some responsibility for this location? Think as widely as you can (café/ shop owners, street pastors, park wardens, council lighting, departments, gardeners, PCSO's, bus drivers, members of the public, environmental health)

How might they be able to help and how might we engage them?

How would we know if we had made this location safer?

Have you identified these areas in your locality risk assessment? If so, what work have you done to help address the risk?
